OBJECTIVE

Operations Executive with over a year at Flipkart Minutes in dark store operations and inventory planning & control. Seeking to grow in inventory planning and supply chain operations, using R, Excel and Google Sheets to improve stock availability and accuracy.

KEY SKILLS

Operations	:	Inventory Planning & Control, Dark Store Operations, First Mile / Inbound, Forward Putaway (IWIT & Non-IWIT), Damage Management, POD Scanning
Tools	:	FKStockIn, MS Excel, Google Sheets, Azkaban, GCP (Google Cloud Storage)
Technical	:	R Programming, Data Analysis
Soft Skills	:	Problem Solving, Cross-functional Coordination, Communication

PROFESSIONAL EXPERIENCE

Flipkart Minutes, Bengaluru **Aug 2025 – Present**

Operations Executive – Dark Store Operations (First Mile)

Inbound flow	Manage end-to-end inbound, from **vehicle unloading and receiving to forward putaway into bins for sale**.
Forward metrics	Drive **IWIT and Non-IWIT putaway** by tracking putaway TAT and compliance to keep stock sale-ready.
POD creation	Create PODs (Proof of Delivery) for received items, enabling accurate and timely partner payments.
Damage control	Reject damaged items at the scanning stage to keep them out of sellable inventory.
Tracking	Maintain daily inbound, putaway and inventory trackers in Google Sheets and Excel.
FWD Pendency	Achieved **zero backlog beyond 48 hours** and **100% FKStockIn adherence** across Pan India.
POD vs GRN	Controlled variance **below 0.1%**, improving reconciliation accuracy.

Operations Executive – Inventory Planning & Control

Planning runs	Run replenishment through two daily crons: **morning (20 lakh capacity cap)** and **evening (14 lakh capacity cap)**. The system utilizes the caps during each run.
Deficit	Calculate at **FSN × Dark Store** level as **Target Units** – **(DS in-transit + DS ATP)**, using DS_Target_Master, DS_Network_Master and SMIT_QAAS CSVs in **Google Cloud Storage (GCP)**. Map each DS to its P0/P1 source hubs.
Allocation	Allocate SH inventory with an **R-based STN script**: apply case-pack rounding and DS, FSN and Mini-store filters, then allocate whitelisted-seller lots by **nearest non-promisable date**, excluding expired lots.
Outputs	Generate **STN upload templates** and a **reconciliation file** explaining every unallocated unit (hold, DS not live, excluded, no ATP, expired).
Automation	Use R scripts and Azkaban scheduled jobs to automate recurring planning and data-update tasks.

INTERNSHIP

ML Intern | People Tech Group, Hyderabad **Mar 2025 – Jun 2025**

- Built a machine learning model that condenses long texts into short, concise summaries.

PROJECT

Inventory Planning Dashboard | Google Apps Script | View Project

- Built a web dashboard for inventory planning visibility and daily inbound and stock tracking.

EDUCATION

B.Tech (AIML) – BVCE Engineering College | CGPA: 8.62 2021 – 2025

Intermediate (MPC) – Sri Chaitanya Junior College | GPA: 9.79 2018 – 2020

Matriculation – Z.P.P High School | GPA: 9.3 2018

AWARDS & ACHIEVEMENTS

- **Rewards & Recognition (RNR) Award**, The Big Billion Days – Flipkart, for operational excellence.
