OBJECTIVE

Operations Executive with over a year of experience at Flipkart Minutes across dark store operations and inventory planning & control. Seeking to grow in inventory planning and supply chain operations, using R, Excel and Google Sheets to improve stock availability, putaway efficiency and inventory accuracy.

KEY SKILLS

Operations	:	Inventory Planning & Control, Dark Store Operations, First Mile / Inbound, Vehicle Unloading, Forward Putaway (IWIT & Non-IWIT), Damage Management, POD Scanning
Tools	:	FKStockIn, MS Excel, Google Sheets, Azkaban, GCP (Google Cloud Storage)
Technical	:	R Programming, Data Analysis
Soft Skills	:	Problem Solving, Cross-functional Coordination, Communication

PROFESSIONAL EXPERIENCE

Flipkart Minutes, Bengaluru **Aug 2025 – Present**

Operations Executive – Dark Store Operations (First Mile)

- Manage the end-to-end inbound process, from **vehicle unloading and receiving to forward putaway into bins for sale**.
- Drive **forward metrics**, with a primary focus on **IWIT and Non-IWIT putaway**, by tracking putaway TAT and compliance to keep stock sale-ready.
- Use **FKStockIn** to create PODs (Proof of Delivery) for received items, enabling accurate and timely partner payments.
- Reject damaged items at the scanning stage to keep them out of sellable inventory, reducing downstream damage and customer-impacting issues.
- Maintain daily inbound, putaway and inventory trackers in Google Sheets and Excel, reducing manual entry errors and giving the team clear stock visibility.
- **FWD Pendency:** Achieved **zero backlog beyond 48 hours** and **100% FKStockIn adherence** across Pan India.
- **POD vs GRN Delta:** Controlled variance **below 0.1%**, improving reconciliation accuracy.

Operations Executive – Inventory Planning & Control

- Run replenishment planning through two daily crons: a **morning cron (20 lakh capacity cap)** and an **evening cron (14 lakh capacity cap)**. The system utilizes the caps during each run.
- Calculate the deficit at **FSN × Dark Store** level as **Target Units** – **(DS in-transit + DS ATP)**, using the DS_Target_Master, DS_Network_Master and SMIT_QAAS CSVs in **Google Cloud Storage (GCP)**, and map each DS to its P0/P1 source hubs.
- Allocate SH inventory to the deficit with an **R-based STN allocation script**: apply case-pack rounding and DS, FSN and Mini-store filters, then allocate whitelisted-seller lots by **nearest non-promisable date**, excluding expired lots.
- Generate **STN upload templates** and a **reconciliation file** explaining every unallocated unit (hold, DS not live, excluded, no ATP, expired).
- Use R scripts and Azkaban scheduled jobs to automate recurring planning and data-update tasks.

INTERNSHIP

ML Intern | People Tech Group, Hyderabad **Mar 2025 – Jun 2025**

- Built a machine learning model that condenses long texts into short, concise summaries.

PROJECT

Inventory Planning Dashboard | Google Apps Script | View Project

- Built a web dashboard for inventory planning visibility and daily inbound and stock tracking.

EDUCATION

B.Tech (AIML) – BVCE Engineering College | CGPA: 8.62 2021 – 2025

Intermediate (MPC) – Sri Chaitanya Junior College | GPA: 9.79 2018 – 2020

Matriculation – Z.P.P High School | GPA: 9.3 2018

AWARDS & ACHIEVEMENTS

- **Rewards & Recognition (RNR) Award**, The Big Billion Days – Flipkart, for operational excellence.
